How to Read the Scores

- **Score (/40)** = Fisher's 15 Points (/30) + 5 modern overlays (/10)
  - Each point and overlay is scored **2** = clearly passes · **1** = partial or unproven · **0** = fails
  - Overlays: ROIC vs cost of capital, FCF per share growth, durability of advantage, capital allocation, cyclicality and concentration
- **Business quality** (from the score and the gate)
  - **34–40** Fisher-grade compounder · **27–33** Strong candidate · **20–26** Watchlist · **below 20** Does not meet Fisher's standard
- **Gate** (management-integrity and dilution knockout)
  - **PASS**: no disqualifier
  - **FLAG**: a serious weakness (e.g. growth funded by issuing shares); caps the classification at Watchlist
  - **FAIL**: integrity or candor fails, accounting red flags, or no growth runway; ends the investment case
- **Call · Conv.** = directional bias and conviction (1–10)
  - **LONG**: compounder or strong candidate at an Attractive/Fair price
  - **PASS**: great business at a demanding price, or Watchlist
  - **AVOID**: fails Fisher's standard or the gate (Fisher is long-only: never SHORT)
  - Conviction 9–10 highest · 7–8 high · 5–6 moderate/starter · 3–4 low/watchlist · 1–2 avoid
- **Price rating and base-case return**
  - Base-case return = 5-year annualized price return: ((EPS at year 5 × exit P/E) ÷ price)^(1/5) − 1, at the Nov 11, 2026 Yahoo Finance quote; 'total' adds the dividend
  - Price rating (Attractive / Fair / Demanding / Unattractive) reflects that return and how much a lower exit multiple would hurt it
  - Sizing: Core · Starter · Avoid, with the entry level where one applies
